DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-29 are rejected under 35 U.S.C. 102(e) as being unpatentable by *Lawrence* et al. (US 2002/0138407).

Lawrence et al. discloses a method for assessing risk (106) for a financial institution, the steps comprising:

outputting the financial institution composite risk assessment on a computer readable medium [0039], [0057], [0059];

wherein the plurality of risk factors are selected from the group consisting of credit risk factor, market risk factor, liquidity risk factor, operational risk factor, legal risk factor, and reputational risk factor [0025];

the generating step further comprising computing an overall risk based on selected combined values of the plurality of risk factor [0022 and 0025];and

the method further comprising generating an alert when a risk factor has exceeded a predetermined threshold [0031].
